PARSCH SNOW HOSE

High pressure Hose
for snow production

Quality made in Germany

Hose Construction

Jacket	100 % polyester high tenacity yarn, circular woven reinforced threads, multiple twisted
Inner Lining	Cold resistant, two-component system consisting of thick black SBR-synthetic rubber and white NBR-synthetic adhesive
External Colouring	Standard colour blue (other colours on request)
Protection Sleeve	Each hose can optionally be fitted with a protection sleeve. This sleeve protects especially the critical area behind the coupling and increases the service life of the hose.

Internal diameter		Weight	Burst pressure	Working pressure*	Wall thickness
mm	inch	g/m	bar	bar	mm
52	2	580	120	60	3,0

* maximum recommended working pressure of the hose or maximum working pressure of the attached coupling whichever is lower

PARSCH SNOW HOSE

High pressure Hose
for snow production

Quality made in Germany

Characteristics

Suitable for use with water and air
High pressure high performance
Very good abrasion resistance and very long service life
Low friction loss and kink resistant
Ageing and ozone resistant — weather resistant
Cold resistant to - 40 °C, heat resistant up to + 80 °C
Thick inner lining guarantees smooth inner surface and low friction loss

Applications

Water and air supply for snow production

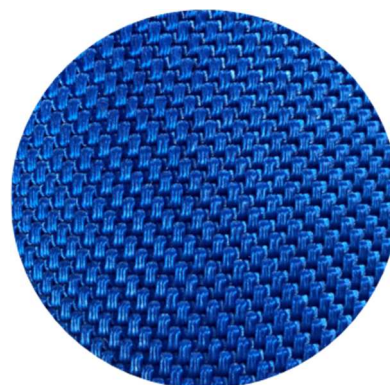

Lengths

Flexible, any length up to 100 m

Couplings

Camlock – Quick Connection couplings
